

ADITYASINH RAULJI

Mobile Application Developer

Surat, Gujarat, India | +91 97244-71244 | adityasinhraulji007@gmail.com | linkedin.com/in/adityasinh-raulji

PROFESSIONAL SUMMARY

AI-forward Android & iOS developer who treats AI as a core development partner, not just a tool. Uses AI coding assistants (GitHub Copilot, ChatGPT, Gemini AI) daily to accelerate development, debugging, and iteration cycles, cutting build time while maintaining code quality. Hands-on experience building native iOS apps (Swift, SwiftUI, ARKit, RealityKit) and Android/cross-platform apps (Java, Kotlin, Flutter). Shipped SportXR, a solo-built augmented reality iOS app submitted to Apple's Swift Student Challenge. Strong foundation in Data Structures & Algorithms (Java) and AI workflow automation (n8n, OpenAI/Gemini APIs, Prompt Engineering). Fast learner with a build-first mindset, combining AI-assisted speed with human problem-solving and full ownership of end-to-end delivery.

TECHNICAL SKILLS

Mobile Development: Android (Java, Kotlin), iOS (Swift, SwiftUI, ARKit, RealityKit), Flutter, Cross-Platform Development

AI-Augmented Development: Daily AI-assisted coding (GitHub Copilot, ChatGPT, Gemini AI), Prompt Engineering, AI-accelerated debugging & iteration, AI Workflow Automation (n8n), OpenAI APIs, Gemini AI APIs

Programming Languages: Java, Kotlin, Swift, Dart, JavaScript

Data Structures & Algorithms: Problem-solving, algorithmic thinking, Java-based implementation

Front-End Development: Angular, HTML, CSS, JavaScript, UI/UX Design

Backend & Tools: Firebase, MySQL, Docker, Git, GitHub, Gradle

PROFESSIONAL EXPERIENCE

Software Developer Intern — Kriptone

Jan 2025 – Mar 2025

- Built and improved front-end UI components using Angular, directly improving responsiveness and user experience across the application.
- Used AI-assisted coding tools (GitHub Copilot, ChatGPT) daily to speed up feature development, debugging, and code reviews, helping meet tight sprint deadlines.
- Collaborated with senior developers to refactor and optimize the codebase, reducing technical debt and improving maintainability.
- Delivered bug fixes and feature enhancements on tight deadlines, maintaining application stability in a production environment.
- Adapted to new frameworks and tooling rapidly, consistently contributing within the first week of onboarding each sprint.

PROJECTS

Dr.Paw — iOS Pet Care App | *Swift, SwiftUI, Supabase, Core ML, WidgetKit, RevenueCat*

- Built a full-featured pet-care app with growth tracking, vet discovery, animal library, widgets, and reminders.
- Integrated Core ML/Create ML for animal recognition and RevenueCat for subscriptions.
- Independently developed and submitted the project to Shipaton 2026.

SportXR — iOS Augmented Reality App | *Swift, SwiftUI, ARKit, RealityKit*

- Built an AR sports interaction app with 360° spatial mechanics using RealityKit.
- Submitted to Apple's Swift Student Challenge.

EDUCATION

MSc, Mobile Application & UI Development — Gujarat University

Core subjects: Android Development, iOS Development, Cross-Platform Development

BSc, Information Technology — Parul University

Graduated: May 2025

Core coursework: Data Structures & Algorithms, Software Development, Mobile Development, Database Management, DevOps
